INTRODUCTION

Analytical Engineer with 5+ years of experience in Snowflake, ODI, Power BI, Oracle Analytic Cloud and SQL specializing in building scalable ELT pipelines and enterprise BI solutions. Strong background in data warehousing, performance optimization, and cross-functional stakeholder collaboration. Proven ability to deliver secure, high-quality data products that enable strategic and operational analytics.

EXPERIENCE

Deloitte USI - Analytics Engineer/Consultant | Mumbai | Sep 2022 -

PRESENT

Project: Exelon Apollo & Constellation

- Built end-to-end ELT pipelines ingesting 30GB/day from ADW, Kafka & S3 into Snowflake, enabling faster enterprise-wide reporting.
- Designed and automated real-time ingestion with Snowpipe, reducing data availability latency by 40%.
- Applied Dynamic Data Masking + RBAC, securing sensitive financial data across business.
- Developed high-performance Power BI reports using direct Snowflake connection (Budgeting, GL Balances, Project Costing).
- Achieved 30% query performance improvement by optimizing clustering, caching, and warehousing strategies.

Tech Stack: Snowflake, Query Profile, Snowpipe, RBAC, DBT, Power BI

Project: Caterpillar – SDP & EPDP (Databricks Lakehouse)

- Built automated ingestion pipelines using Autoloader & Lakeflow Connect to unify relational, streaming, and object-store data, improving ingestion reliability to 99.8% and reducing data availability SLAs by 40%.
- Implemented Delta Lake architecture with optimized ELT pipelines, cutting transformation runtime by 35% and improving data consistency for SDP & EPDP analytics teams.
- Delivered curated Gold datasets to DBSQL and BI layers, improving dashboard refresh performance by 45% and enabling faster Op insights for 200+ users.

Tech Stack: Databricks, Delta Lake, Autoloader, Lakeflow, DBSQL, Power BI

Tata Consultancy Services - BI Developer / Data Engineer |

Mumbai | Aug 2020 - Sep-2022

Project: HCSC Enterprise Data Platform

- Built custom ETL extensions and integrated ERP, EPCM, and OTBI data models improving data processing accuracy.
- Designed Fact and Dimension models in ODI and implemented SCD and custom KM's for historical tracking.
- Extended ADW tables for Power BI semantic layer, developing dashboards for Inventory, Project Management, and GAAP-FERC validation. **Tech Stack:** ODI, Oracle ADW, EPCM, OTBI, dSeries, Power BI, CLN Framework

SKILLS

Data Warehousing

Snowflake, Oracle ADW, ODI, PySpark, AWS, Snowpipe, DBT

BI & Analytics - Power BI,

DAX, M Query, OAC, FDI, SQL, Python

Version Control & CI/CD -

GIT, BitBucket, FlexDeploy

Soft Skill - Stakeholder

Management, Analytical Problem Solving, Agile Collaboration, Communication.

AWARDS

PACE Award: Delivered critical business requirements ahead of schedule

Applause Award (x2):

Supported multiple PODs & SIT with strong ownership

Spot Award (x3): Delivered optimized and efficient data engineering solutions

EDUCATION

University of Mumbai

— B.Sc in IT - 94 CGPA

2017 - 2020

Bachelor in Information

Technology from K.C

College

CERTIFICATION

Snowflake Snowpro Core Certificate

Microsoft Power BI Data Analyst Associate

Microsoft Azure 900 Fundamentals

Oracle FBDI Professional
